

User manual

1 APP download

① Visit <http://www.eye4smart.com> to download the APP

② Search "Eye4Smart" in App Store, Google Play or other mobile phone application store.

③ Scan the QR code below to download.

2 Account sign up

Select the "sign up" on APP, complete the sign up by inputting username and pass code.

3 Add Smart Bulb

Please add it step by step, as shows in below step 1, 2, 3.

Step 1: After login in the APP, please click "+" in the top right corner, there are two ways to add it.

The first method: Scan to add

Click "Scan to add", please scan the QR code on the body of the device.

The second method: Others

Click "Others", then please choose "Smart Bulb".

Reminder: For the first time, please plug in the power supply, and make sure that the blue light is solid on. If not, please reset. (**Reset method:** please restart the bulb on or above 5 times, then the light will turn to blue)

Step 2: Please follow below steps for different mobile phone.

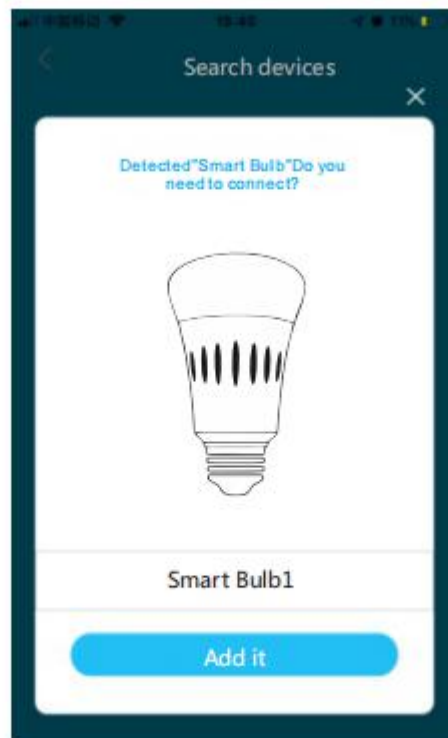

For the first time, please select the WiFi that your mobile phone connected, and then enter the password to next step.

For the first time, please follow the interface prompts to add the smart bulb's WiFi hotspot E11E.xxxxxxxx Password: 12345678. Then return to Eye4Smart APP, please select the WiFi that your mobile phone connected, and then enter the password to next step.

After that, the APP will search devices automatically, then click "Add it".

Step 3: For Android devices, if the APP failed to search the device, the “Manual connection” will pop up, please follow below steps to add the device:

Click “Manual connection” , it will go to Settings WiFi page, please select the hotspot EII.E.xxxxxxxx, Password: 12345678. Then return to Eye4Smart APP, please click “Add it”.
